(54) RETRIEVAL PROCESSING SYSTEM AND RETRIEVAL PROCESSING METHOD

(57)Abstract:
PROBLEM TO BE SOLVED: To reduce communication quantity and to facilitate browsing by clients regarding a retrieval processing system and a retrieval processing method to retrieve a data base by a retrieval server according to a retrieval request of the clients.
SOLUTION: In the retrieval processing system having the retrieval server 2 to retrieve the data base 1 according to the retrieval requests from clients 5-1 to 5-m, in the data base 1 meta data subjected to describe features of segments formed by hierarchically dividing data of contents servers 3-1 to 3-n are stored together with keywords, the retrieval server 2 is provided with a filtering processing part 7 to retrieve the data base 1 according to a retrieval request to which restricting conditions from restricting condition generation processing parts 8 of the clients are added and to transmits a retrieval result by performing a filtering processing according to the restricting conditions to the clients.
